Missing from this item is the final cost for this campus, from start to finish. Will the vendor complete the job for this amount? Will they be bound to cover any price increases? Is this another open-ended city contract?

Why is that?

No one has explained why this community was designed without conventional connections to the east.

Was this to keep riffraff out, or was it an accident?

This insular road design has prevented residents, since day 1, from easily riding to existing facilities. This failure to use good road design has led to unaffordable spending in the new area.

If locals must pay for a segment of sidewalk, why do "locals" get bike paths and pools without a local improvement fee?
