My opposition specifically relates to the proposed change to Route FX4 at Polo Park, for two reasons:

- a.) The proposal would remove service outright from the terminal stop at the west side of the mall, and lead to a reduced quality of service along southern St. James Street (since the other route serving this stretch, the D15, runs less often, has shorter service hours, and does not directly serve popular downtown locations, such as the University of Winnipeg or Canada Life Centre). The current FX4 service along this two-stop stretch is well-used.
- b.) The proposal would often remove FX4 service from the eastbound stop at Portage & Tylehurst (stop 10562). This stop is a popular transfer location for passengers headed downtown transferring from various connector and community routes that also serve that stop. Passengers would be left with the options of crossing Portage, riding their feeder route around Empress East to the terminal (and both options could lead to missed connections), or taking the already-crowded BLUE instead.

With these negative factors in mind, I would strongly recommend either maintaining the FX4's current westside terminal, or additionally change routes D16, 22, 70 and 680 to access the terminal by turning left off of EB Portage (assuming such a maneuver would be made possible by the intersection modifications).

Public engagement (optional)

I consent to being contacted to participate in potential public engagement related to this matter.
