5. That Development Application No. DAZ 201/2026 will be deemed to be concluded and all approvals in connection with same will expire if the developer has not paid the Fees within 2 years following the date on which Council gives first reading to the By-law, unless the developer applies for an extension of time before the expiration of that 2 year period and Council approves the extension.

6. That the By-law will come into force when the Zoning Agreement is fully executed and registered in the Winnipeg Land Titles Office by way of caveat against the lands described therein.

COMMUNITY COMMITTEE RECOMMENDATION (continued):

7. That the By-law will be repealed without coming into force 1 year following the date it is enacted if the Zoning Agreement is not registered in accordance with recommendation 6, unless the developer applies for an extension of time before the expiration of that 1 year period and Council approves the extension.

8. That the Variance order shall come into force and effect upon the coming into force and effect of the zoning by-law for the subject land under File DAZ 201/2026.

9. That the Proper Officers of the City be authorized to do all things necessary to implement the intent of the foregoing.

10. That subject to the approval of the application, that the Winnipeg Public Service be directed to refund all associated application fees, less the cost of advertising.

9. That the proper officers of the City be authorized to do all things necessary to implement the intent of the foregoing.

REASON FOR THE REPORT

- The applicant proposes to rezone 900 McLeod Avenue for the purpose of expanding an existing place of worship.

- A Rezoning (DAZ) application is required to rezone the lot and enable the proposed development.
- Rezoning applications require a public hearing as per the *Development Procedures By-law* and *The City of Winnipeg Charter.*
- The Report is being submitted for the Committee's consideration of the development application at the public hearing.

IMPLICATIONS OF THE RECOMMENDATIONS

- If the recommendations of the Urban Planning and Design Division are concurred in, the land **can** be rezoned in accordance with Schedule "B".

HISTORY

DAZ 214/2021

- A Rezoning application was passed by Council in 2022 to construct an addition to an existing place of worship use.

- The by-law expired and there were no formal extensions requested by the applicant, as a result, the applicant was required to re-submit a new DAZ application.

DAV 21-233416D

- A Variance application associated with DAZ 214/2021 (**see above**) was approved by the East Kildonan-Transcona Community Committee in 2022 to construct an addition to an existing place of worship use.

- The associated Variances for rear yard setback and parking requirements of the Winnipeg Zoning by-law also expired within two (2) years. As a result, the applicant was required to resubmit a new Variance application (**see Report for DAV 25-268490\D**).

DAZ 285/1986

- A Rezoning application was passed by Council in 1986 to rezone the east half of the site to "C2". The west half of the site remained "R1-M" which had an existing single-family dwelling use. In December 2020, a demolition permit was approved to remove the single-family dwelling.

OURWINNIPEG 2045 POLICY ALIGNMENT

OurWinnipeg 2045 Goal – City Building

A successful strategy for sustainable city growth uses a variety of planning approaches. It strikes a balance between 'growing out' and 'growing up', offering choices ranging from traditional, single-family neighbourhoods to denser forms of urban housing and new neighbourhoods designed around a mix of land uses and a sustainable transportation system.

Building a city of complete communities provides the following additional benefits:

- *Minimization of environmental impacts per capita, in support of better air quality, resource efficiency, waste management, and climate change mitigation*
- *Adaptability to climate change and resilience to natural hazards*
- *Promotion of more active lifestyles and increased social interaction*

City Building Objectives

- **City Building Objective 1.** Responsibly plan, prioritize and accommodate growth in areas that best support Complete Communities principles, to achieve this Plan's sustainable development goals:
    - *Facilitate growth and change strategically within Winnipeg's unique Transformative Areas and Established Neighbourhoods, to enhance the ability of the urban environment to contribute towards this Plan's goals.*
- **City Building Objective 2***.* Integrate resilient land use, transportation and infrastructure planning, and investments:
    - *Ensure that land use, transportation, and infrastructure planning are aligned to provide the conditions for compact, complete and connected communities, supported by sustainable transportation options and municipal infrastructure capacity.*
- **City Building Objective 3.** Facilitate development opportunities that complete established communities, and plan new communities as complete and connected from the outset:
    - *New and existing communities are complete when they demonstrate: universally designed environments; mixed-income neighbourhoods; a continuum of housing types; multi-modal connections within and to elsewhere in the city; heritage conservation; opportunities for physical activity, social interaction, and access to healthy food, daily needs, employment, education, recreation, and green infrastructure*.

WINNIPEG CLIMATE ACTION PLAN ALIGNMENT

Strategic Opportunity #4: Facilitate Compact, Complete Development and Increase Density

- **Key Direction 4.1:** Increase strategic infill development that provides access to and capitalizes on existing and planned corridors with frequent transit service
- **Key Direction 4.2:** Ensure new areas of growth are designed according to the principles of Complete Communities.

WINNIPEG POVERTY REDUCTION STRATEGY ALIGNMENT

Consideration was given to whether this report connects to any of the specific Goals and Objectives in the *PRS* and it was determined the *PRS* is not applicable to this specific report.

ANALYSIS AND ISSUES

COLLABORATIVE PLANNING AND CONSULTATION

With the Public Service

- The applicant engaged with the Urban Planning and Design Division prior to submitting an application.

COMPLETE COMMUNITIES DIRECTION STRATEGY 2.0

- The *Complete Communities Direction Strategy 2.0* (CCDS 2.0) is one of four direction strategies supporting *OurWinnipeg 2045*, the city's long-range development plan, and has statutory authority as a secondary plan. The Strategy guides land use and development in Winnipeg.
- The subject property is in an Established Neighbourhoods "Recent Communities" policy area of *CCDS 2.0*. Applicable goals and policies include:

- **Goal 2** 2.0 Design new development in Established Neighbourhoods to a high standard of urban design and construction to ensure new development adds value to public and private urban spaces to create a sense of place and civic pride.
    - *2.2 Encourage the location of commercial or mixed-use buildings at or near the front and corner side property lines to create a pedestrian orientation. Use setbacks to reinforce the public realm through landscaping and pedestrian amenities, such as entryways, patios, benches, and bicycle parking.*
    - *2.4 Encourage the use of high-quality, energy efficient, and durable exterior building façade materials.*
    - *2.5 Encourage a variety of architectural styles.*
    - *2.6 Encourage building design to include a range of architectural features that create visual interest and positively contribute to the visual aesthetics of the street and neighbourhood.*
    - *2.8 Buildings with commercial uses should be designed to support pedestrian activity by providing building elements that increase visual interest which may include, but are not limited to, the following: a. Direct pedestrian access to main building entrances from the street; b. Transparent storefront displays; c. Human scaled signage; and d. Decorative lighting, awnings, benches and other pedestrian oriented amenities.*
    - *2.10 Discourage building designs that orient the back of the building to the street.*
    - *2.12 New development should respect and complement the existing character of the built form of surrounding properties.*
    - *2.14 Avoid buildings that create long blank walls facing public streets.*
    - *2.15 Encourage the use of architectural features to articulate building walls in order to mitigate the impact of new building mass.*
    - *2.19 Where motor vehicle parking must be accessed from a front street, it should be effectively screened or incorporated into the building in a manner that positively contributes to the attractiveness of the streetscape.*

- *2.21 Site design should take cues from the character of the neighbourhood or street and should mitigate the potential for land use conflict with adjacent properties that have different scales, densities and uses. Parking location (motor vehicle and bicycle), vehicular access, servicing elements, building placement and landscaping treatment will be important design elements to ensure context-sensitive design.*
- *2.22 Create or reinforce compact, pedestrian-oriented urban development patterns by ensuring the siting, form and scale of new development has a strong relationship to the street, public spaces and amenities in a way that is consistent with neighbourhood context.*

- **Goal 4** 4.0 Ensure neighbourhoods accommodate a range of commercial services and amenities within walking distance to meet daily needs.
  - *4.1 Support commercial development where residential neighbourhoods are not well served by local and community commercial amenities.*
  - *4.2 In order to protect the vitality and viability of existing commercial areas, encourage the redevelopment and infill of existing commercial areas as the preferred method of accommodating new commercial development.*
  - *4.4 New commercial development should be complementary and context sensitive to nearby uses.*
  - *4.13 Consider new locations for small scale commercial uses that have a neighbourhood focus if they meet at least one of the following criteria: a. The property is located on a collector or arterial road abutting existing commercial uses at the periphery of the neighbourhood; b. Immediately adjacent uses render the subject property unsuitable for residential development; and c. The property contains existing non-residential uses or buildings that were not designed to accommodate residential uses*

<u>Goal 2 and 4 Established Neighbourhoods “Recent Communities” Policy Alignment</u>

- The building design creates visual interest and supports pedestrian activity through architectural features such as a direct pedestrian access to the building from the public sidewalk, ornate window patterns, skylights, and transparent window displays.
- The development respects the existing character of the built form of properties across the street as well as the existing building on the lot.
- Parking at the front is screened with new landscaping (trees and shrubs) to create an attractive streetscape.
- The site design takes cues from the character of the neighbourhood, including front approaches for vehicle access, buildings substantially set back, and landscaping to ensure a context-sensitive design.
- The expansion to the existing commercial development protects the vitality and viability of existing commercial areas.
- The commercial development is in line with commercial uses nearby in terms of scale, massing, and built form.
- The new location is suitable for small scale commercial uses that have a neighbourhood focus in that it is on a collector road abutting existing commercial uses at the periphery of the neighbourhood and the lot already contains a non residential use.

ADDITIONAL CONSIDERATIONS

Variances

- A Variance application is required for yard setbacks and parking requirements of the *Winnipeg Zoning By-law* (**see Report for DAV 25-268490/D**).
- The Report recommends ***approval*** of the Variance application.

Substantial Conformance or Plan Approval

- The Urban Planning and Design Division recommends a condition for substantial conformance or Plan Approval to the Director of Planning, Property and Development and the East Kildonan-Transcona Community Committee (EKTCC).
- Substantial conformance ensures the final plans reflect the submitted plans, otherwise Plan Approval approved by the Director and EKTCC is recommended to ensure site design and building design meet a high standard of urban design before construction takes place on the site.

Principal Uses as Conditional Uses and Prohibited Principal Uses/Use Categories

- The Division recommends a number of principal uses as conditional uses and several prohibited principal uses/use categories.
- The uses match those approved by Council in 2022 under DAZ 214/2021.
- The recommended principal uses as conditional uses ensure that any uses normally permitted within the “C2” zoning district will be reviewed and supported only when they demonstrate they are compatible with the existing development context and will not have a substantial adverse effect on the surrounding area.
- The recommended prohibited principal uses and use categories are uses that may pose negative impacts on abutting and adjacent residential uses.

Height Cap

- As part of the recommended Zoning Agreement, a height cap of 35 feet is included.
- The proposed development is approximately 25 feet, and the recommended height cap ensures there is both some additional space should the project plans change while also ensuring the maximum building height is similar to what is consistent and permitted in the surrounding neighbourhood of primarily “R1-M” zoned lots.
- Without a height cap, the maximum permitted height would be 49 feet in the “C2” zoning district.

RECOMMENDATIONS

The Urban Planning and Design Division recommends **approval with conditions** of the Rezoning application for the following reasons:

- The application is consistent with policies and design guidelines in *OurWinnipeg 2045*, *and Complete Communities Direction Strategy 2.0.*
- The proposed use, scale, masing, and built form are context-sensitive and compatible with adjacent buildings, dwellings, and land uses.
- The design of the building mitigates land use conflicts and massing impacts on the nearby lower-density residential uses.
