The Lord Selkirk – West Kildonan Community Committee provided the following supporting reasons for its recommendation:

1. The apartment building has been located there a very long time and actually, I can tell you about 3 decades ago was not in the greatest condition.

2. I'm glad to see that there's owners of the building that they're actually putting money in to make sure that this building is coded as in good shape and its actually for that reason that I'm supporting the rezoning of the apartment block, that we meet today's requirements.

DESCRIPTION OF THE PROPOSED DEVELOPMENT

- The applicant intends to rezone the subject site to “RMF-L” Residential Multi-family (Large) to bring the current density in the existing building at 229 Machray Avenue into compliance.
- The applicant’s letter of intent states that at the time of purchase, the 29-unit building included two additional dwelling units that were already constructed.
- The intent of this application is to legally establish these two existing units, bringing the total number of units on the property to 31 dwelling units.
- The existing site condition includes three parking spaces parallel to the public lane, without marking to delineate spaces. A front-end garbage bin at the northeast corner of the site.
- Plans submitted include a garbage enclosure and three marked parking spaces including one accessible space abutting the sidewalk, and one guest parking space.
- No additional exterior alterations or construction are proposed as part of this application.
- The proposed development requires Variances associated with the proposed density, lot area, front yard, west corner side yard and rear yard setbacks, a parking reduction, parking with 10 feet of a habitable window, and for insufficient buffering and landscaping. Please refer to the Planner’s report for analysis of the proposed Variances (DAV 25-160142\D).

ANALYSIS AND ISSUES

COMPLETE COMMUNITIES DIRECTION STRATEGY 2.0

- The *Complete Communities Direction Strategy 2.0* (*CCDS 2.0*) is one of four direction strategies supporting *OurWinnipeg*, the city’s long-range development plan, and has statutory authority as a secondary plan. The strategy guides land use and development in Winnipeg.

- The subject property is located in an Established Neighbourhoods – Mature Community policy area as outlined in *CCDS 2.0*. The Vision for Established Neighbourhoods is to continue to evolve as complete communities to increase the diversity of housing choices, improve housing affordability, and more efficiently use land, infrastructure and services.
- With regard to this proposal, the key goal and policies guiding the development of Established Neighbourhoods are as follows:

  1.0 Encourage compatible residential development within Established Neighbourhoods to build more Complete Communities and align with the City's residential intensification target.

  1.1 Encourage residential development that positively contributes to neighbourhood character while expanding housing options for residents in a manner that is sensitive and complementary to existing development.

  1.2 Increase the population within Established Neighbourhoods to contribute to the physical renewal and revitalization of older neighbourhoods.

  1.5 Support up to mid-rise residential development in Established Neighbourhoods that is compatible with neighbourhood context.

  1.6 In the absence of a secondary plan guiding the local development of an Established Neighbourhood, intensification should be guided by a number of factors to ensure compatible development, including:

  - *Applicable City-endorsed policies or guidelines;*
  - *Existing zoning of the property and adjacent properties;*
  - *Characteristics of the immediately surrounding built form including building mass, height, lot coverage, setbacks, and layout;*
  - *Surrounding uses and their characteristics including residential density and the intensity of commercial and other non-residential uses;*
  - *Characteristics of the lot, including whether it is a corner lot, a larger lot than is typical for the neighbourhood, or the shape of the lot;*
  - *The supporting street network (ex. local, collector, or arterial streets) and the street network's ability to support proposed development;*
  - *The supporting transit, pedestrian and active transportation network; and*
  - *The supporting water, wastewater, and land drainage infrastructure and capacity to accommodate a proposed development or ability to make the required upgrades necessary to accommodate a proposed development.*

  2.3 Encourage, where contextually suitable, the location of multi-family buildings at or near the front and corner side property lines to create a pedestrian orientation that is respectful of the area context. Use setbacks to provide landscaping, front courtyards for individual units or other amenities that support the pedestrian environment, building design and relationship to the street.

  3.0 Ensure all communities provide a diversity of housing options and meet resident life-cycle housing needs.

  3.1 Encourage a variety of housing types and tenures within Established Neighbourhoods to meet life-cycle housing needs and affordability ranges.

  3.2 Encourage a mix of types, tenures and unit sizes within residential developments. Make provisions for unit sizes that can accommodate varying family sizes and multi-generational households.

CITY OF WINNIPEG ZONING BY-LAW 200/2006

"RMF-L" Residential Multi-family (Large) District

- The applicant is proposing to rezone the property to "RMF-L" Residential Multi-family (Large) to legally establish two existing units in an existing multi-family residential building, and to bring the current density into compliance with the Zoning By-law.
- The intent of the "RMF-L" district is to accommodate the development of multi-family units in areas with medium to high residential densities.
- The dimensional standards for multi-family structures in the "RMF-L" zone are:
  - A minimum lot area of 20,000 square feet;
  - A minimum lot area per dwelling unit is 400 square feet;
  - A minimum front yard of 25 feet;
  - A minimum rear yard of 25 feet;
  - a minimum interior side yard of 8 feet (where the building is more than one storey in height the required interior side yard increases by 2 feet for each storey above the ground floor to a maximum of 20 feet);
  - a minimum corner side yard of 20 feet; and,
  - a maximum building height of 150 feet.

ANALYSIS OF PROPOSED REZONING

- The proposed rezoning to an "RMF-L" Residential Multi-family (Large) District applies is intended to bring an existing multi-family building constructed in 1914 into compliance with current standards. The existing 29-unit building has two additional basement units that were not legally established. The current owner seeks to formalize these units, however this nullifies the existing non-conforming rights of the existing building. The proposed changes trigger the subject Rezoning and Variance applications.
- Per *CCDS 2.0* policies, higher intensity residential development is encouraged along Mixed Use Corridors which are characterized by moderate to high volume retail and commercial roadways, located on the Primary Transit Network, containing multi-block sections where development patterns are conducive to supporting higher density mixed-use pedestrian environments, and are accessible, safe, and attractive for pedestrians and cyclists.
- Although the subject site is not on a designated Corridor, the established residential context, corner location, high degree of neighbourhood walkability, proximity to the Main Street Urban Mixed Use Corridor and to a broad range of commercial services are supporting factors in the support of the "RMF-L" Residential Multi-Family (Large) Zoning District.

CONDITIONS OF APPROVAL

- The Urban Planning & Design Division recommends a zoning agreement requiring that if the existing building is demolished tthat plans be submitted to the Director of Planning, Property and Development and Lord Selkirk – West Kildonan Community Committee for review prior to the issuance of a development permit on the site. The inclusion of this clause will allow the Urban Planning Division and the Lord Selkirk – West Kildonan Community Committee to review final plans before development takes place for any future developments on the site.

- To limit the potential shadowing of the neighbouring properties by future development and recognizing the maximum building height permitted in the 'RMF-L' zone is 150 feet, the Public Service is recommending that the maximum height of any building on the subject site be restricted to 60 feet in line with "RMF-M" Residential Multi-family Medium zoning.

RECOMMENDATION

The Urban Planning Division recommends **approval** as the proposed rezoning application would generally comply with the *Complete Communities Direction Strategy 2.0 and* would be compatible with the surrounding area.
