Subject: RE: Plan Winnipeg Public Hearing - Executive Policy Committee - Waverley West

Dear Ms. Rudiak.

Thank you for your e-mail message and for the correction - Tuesday January 4 rather than January 5, 2005.

The attachments are most convenient.

A number of people who would like to respond to the proposed Waverley West PW amendment have been waiting for the developers' cost-benefit study. Some weeks ago, the developers undertook to make it public. While the developers have shared the study with members of the land development industry and the media (see Winnipeg Free Press, Friday 10 December), as of today, the public has been denied access.

This clearly puts the public at a singular disadvantage in trying to speak to the amendment. For this reason, we respectfully request that the public hearing be delayed until two months after such time as the developers choose to share their complete cost-benefit study with the public.

Sincerely,
Elizabeth Fleming
