I am in support of the Motion to more consistently and effectively protect Wpg's waterways. For decades, they often have been treated as garbage dumps. The City needs to do a much better job of protecting our current natural amenities - tree canopy, biodiversity, access to parks and green spaces, wildlife corridors and habitats, water preservation. This motion is a move in that direction, esp. to put environmental concerns and protections as priorities in decision-making, rather than after-thoughts. This is especially important in light of the current re-zoning process, the housing incentives, the pending Greenspace Master Plan, the pending Biodiversity Policy, the pending Consolidated Public Tree Policy, and the existing Ecologically Sensitive Natural Land Policy.

It would be SO refreshing to have Wpg be a leader in this initiative.
