REASON FOR THE REPORT:

The City of Winnipeg Charter Act provides that the cost of carrying out a local improvement may include the costs of financing. In keeping with this requirement, it is desirable to have Council formally approve the interest rates to be charged to property owners for local improvements for which local improvement taxes are first imposed in 2005.

HISTORY:

For many years the City has established interest rates for financing local improvements prior to the start of a new fiscal year. When a property owner chooses to have a local improvement financed over time as opposed to paying it outright, the property owner is charged interest on the local improvement at the established rates over the financing period chosen.

DISCUSSION:

Section 418 of The City of Winnipeg Charter states, “The City may include the following in the cost of carrying out a local improvement: (d) the cost of financing the local

improvement;". For administrative purposes, it is desirable to have interest rates for local improvements approved by Council. The different interest rate terms are designed to reflect the variety of work being undertaken and to take into account the expected life expectancy of the work. As an example, concrete work is financed over a ten-year period, sewer work is financed over a twenty-year period.

FINANCIAL IMPACT STATEMENT

There is no financial impact as the interest rates set for financing local improvements provide for the recovery of the City's cost of capital and assessment and collection costs.
