École Springfield Heights School Play structure

Updated Application

Our Organization

The Parent Advisory Council (PAC) of École Springfield Heights School (ESHS) is a non-profit organization that represents parents and guardians and serves as a vital link between families, the school, and the broader community. Committed to transparency and accountability, the PAC reports on its activities and finances and works collaboratively with the school board, administration, and staff to support student success. Its goal is to foster a positive environment that promotes healthy, active, and inclusive spaces.

Current Project

PAC is currently leading the planning, development, and fundraising for an accessible play structure which neither ESHS nor the neighbouring North Kildonan Community Centre (NKCC) currently have. The play structure will be located where the former play structure used to be in the school green space which serves as a community hub between ESHS and NKCC.

Project Objectives

The project will serve families from the Kildonan–River East and Rossmere neighbourhoods, the on-site daycares at both ESHS and the NKCC and families from the broader community who access NKCC. This will create an additional place for outdoor play for the many families who live in surrounding apartment blocks. This project will fill a longstanding gap created by the absence of a community playground structure.

This project directly aligns with community-focused grant criteria by addressing a critical recreational gap and creating a shared public asset that will serve multiple organizations and hundreds of local families. NKCC has submitted a letter of support to share the commitment to improving children's health and access to safe outdoor recreation with this project. Minister Tracy Schmidt, the MLA for Rossmere and the Minister of Education, has presented PAC with a letter of commitment for \$100,000 toward our play structure project, recognizing the importance of this initiative to the community.

The project involves planning and constructing a modern play structure intentionally designed to be accessible, and to support active, imaginative, and social play for children of all abilities. The new structure is designed to last for decades and will be accessible during and outside school hours, creating a long-term public asset for the broader community. We have reviewed designs from several companies and have selected to work with Art of Play..

The goal is to begin the project this fiscal year and complete it by Fall2026.
