Subject: waverley west hearings at EPC

Attention EPC Clerks Office
I have phoned in my registration to speak at the hearings, however I was asked to email in a registration as well. This is it.
I would like a detailed agenda for the meeing including the terms of reference for the public hearings including schedule, duration, time limits, question and answer format etc.
I am also aware of a request to delay the hearings until all studies on the proposal for Waverley West have been made public with enough time for consideration by the public. Having information made public just before Christmas and holding this hearing immediately after Christmas and New Years break is a manipulation of public process that limits meaningful public access to the decision making process. A decsion to ammend Plan Winnipeg to accomodate this suburban expansion of our city will have profound impacts and deserves careful and consideration and democratic process. It should not be conducted as "a done deal" as so many of the City of Winnipeg important decisons have been undertaken.

Thanks,
Marianne Cerilli
