DECISION MAKING HISTORY (continued):

Supporting Reasons:

1. It's a low impact change to the neighbourhood. The low level of commercial activity is not a big problem here. I think it can get to be a problem, but this example here excites Stafford Street.

2. Even though they're going to have a lot of windows to clean, that's the owner's property to deal with.

3. The house itself, I've walked by it a few times. It's in need of some serious financial love to get back up. These old houses, as we all know, they require a fair bit of investment.

4. I think this will allow the owner to be able to invest in that commercial nature and be able to put some money in to keep the house looking like a house and fitting in with the neighbourhood well.

ANALYSIS AND ISSUES

Complete Communities Direction Strategy 2.0 (CCDS 2.0)

CCDS 2.0 is a direction strategy supporting OurWinnipeg, the city's long-range development plan, and has statutory authority as a secondary plan. The strategy guides land use and development in Winnipeg.

The subject property is located in an Established Neighbourhood designated as a "Mature Community" (MC) as outlined in *CCDS 2.0.*

- Goal 2 states "design new development in Established Neighbourhoods to a high standard of urban design and construction to ensure new development adds value to public and private urban spaces to create a sense of place and civic pride."
- General policies for Established Neighbourhoods that relate to the subject proposal are as follows:

  1.2 Encourage the location of commercial or mixed-use buildings at or near the front and corner side property lines to create a pedestrian orientation. Use setbacks to reinforce the public realm through landscaping and pedestrian amenities, such as entryways, patios, benches, and bicycle parking.

  2.6 Encourage building design to include a range of architectural features that create visual interest and positively contribute to the visual aesthetics of the street and neighbourhood.

  2.8 Buildings with commercial uses should be designed to support pedestrian activity by providing building elements that increase visual interest which may include, but are not limited to, the following:

  a. Direct pedestrian access to main building entrances from the street;

  b. Transparent storefront displays;

  c. Human scaled signage; and

  d. Decorative lighting, awnings, benches, and other pedestrian oriented amenities.

  2.21 Site design should take cues from the character of the neighbourhood or street and should mitigate the potential for land use conflict with adjacent properties that have different scales, densities and uses. Parking location (motor vehicle and bicycle), vehicular access, servicing elements, building placement and landscaping treatment will be important design elements to ensure context-sensitive design.

- Goal 4 states "ensure neighbourhoods accommodate a range of commercial services and amenities within walking distance to meet daily needs."
- General policies for Established Neighbourhoods that relate to the subject proposal are as follows:

  4.4 New commercial development should be complementary and context sensitive to nearby uses.

4.10 Consider the establishment of new neighbourhood-focused, small scale commercial uses where at least one of the following criteria are met:

a. The property is a corner lot fronting a collector or arterial street;

b. The property abuts an existing commercial use on a collector or arterial street;

c. Immediately adjacent uses render the subject property unsuitable for residential development;

d. The property contains existing non-residential uses or buildings that were not designed to accommodate residential uses.

The subject proposal aligns with the above applicable policies for Mature Communities (MC) for the following reasons:

- The development will adaptively reuse an existing building that fits into the surrounding character of the area;
- The proposed use adds a retail store which will serve the growing population of Crescentwood;
- The proposed use will add to the liveliness of the street where existing commercial activities are located;
- The commercial proposal meets *CCDS 2.0* policies for building design, in particular MC policy 2.6 (the addition will include significant glazing, a rooftop patio/balcony overlooking Stafford St, and adds architectural interest to the existing building). The proposal also meets two of the four criteria in MC policy 4.10 for the establishment of new neighbourhood-focused small scale commercial uses (the property is a corner lot fronting an arterial street and abuts existing commercial uses on said arterial street).

ADDITIONAL CONSIDERATIONS

Site Servicing

The Administrative Coordinating Group (ACG) outlined in Appendix B of this report advises that there is adequate servicing for the proposed development based on the provided development plans. The subject land is also located in a combined sewer district, and any development on the land cannot result in an increase in flow into the combined sewer. In the event that the development plans change, WWD will need to review the revised proposal.

SUMMARY

The Urban Planning Division supports the rezoning, because:

- *CCDS 2.0* supports new commercial uses on corner lots fronting arterial streets and for lots located on arterial streets abutting existing commercial uses. The “C1” Commercial – Neighbourhood District is the lightest commercial designation and provides appropriate allowances for commercial in mature, residential neighbourhoods.
- The commercial addition is well-designed and meets several *CCDS 2.0* Mature Community policies, including:

- 2.2: The commercial addition is at the corner side property line, creating a pedestrian orientation.
- 2.6: The building addition adds architectural interest and positively contributes to the visual aesthetics of Stafford St.
- 2.8: The building addition supports pedestrian activity by providing building elements that increase visual interest, including direct pedestrian access to its main entrance from the street, transparent storefront displays, human scaled signage, and pedestrian oriented amenities such as planters.
- 4.4: The building addition is minimal and adds to the character of the neighbourhood. A "C1" Commercial – Neighbourhood designation allows for commercial at an appropriate scale.
- 4.10: The property meets two of the four criteria for supporting new commercial, including its location on a corner, its frontage onto an arterial street, and adjacent commercial-zoned lots to the north and east.

CONSULTATION

In preparing this report there was internal consultation with: Land Development, Zoning & Permits, Parks.

OURWINNIPEG 2045 POLICY ALIGNMENT

OurWinnipeg 2045 Goal: City Building

- City Building Objective 1: Responsibly plan, prioritize and accommodate growth in areas that best support *Complete Communities* principles, to achieve this Plan's sustainable development goals.
- City Building Objective 2: Integrate resilient land use, transportation and infrastructure planning, and investments.

WINNIPEG CLIMATE ACTION PLAN ALIGNMENT

Strategic Opportunity 4: Facilitate Compact, Complete Development and Increase Density.
