The Lord Selkirk – West Kildonan Community Committee provided the following supporting reason for its recommendation:

1. It sounds like great attention has been paid to this particular address on McPhillips and by clarifying with the residents and neighbours close by, they were more comfortable that someone is paying attention and that whatever business that are going to be in here will be legitimate and good neighbours.

- The proposed development requires Variances associated with the reduced setbacks to the existing building, a parking reduction, and for insufficient buffering and landscaping. Please refer to the Planner's report for analysis of the proposed Variances (DAV 26-110541\D).

COLLABORATION

- The applicant consulted with the Urban Planning and Design Division to confirm support and make minor revisions prior to submitting the subject applications.

ANALYSIS AND ISSUES

COMPLETE COMMUNITIES DIRECTION STRATEGY 2.0

- *The Complete Communities Direction Strategy 2.0 (CCDS 2.0)* is one of four direction strategies supporting *OurWinnipeg*, the city's long-range development plan, and has statutory authority as a secondary plan. The strategy guides land use and development in Winnipeg.
- The subject site is designated "Established Neighbourhood - Mature Community" under CCDS 2.0 and applicable goals and policies that apply to the proposal are noted below.

Building design

2.8 Buildings with commercial uses should be designed to support pedestrian activity by providing building elements that increase visual interest which may include, but are not limited to, the following:

- 1) Direct pedestrian access to main building entrances from the street;*
- 2) Transparent storefront displays;*
- 3) Human scaled signage; and*
- 4) Decorative lighting, awnings, benches and other pedestrian oriented amenities.*

Parking and loading

2.16 For properties with public lane access, vehicular access should be taken from the public lane in order to:

- a. Reduce potential conflict between pedestrians using sidewalks and motor vehicles crossing the public right-of-way to access private property;*
- b. Preserve green space and protect existing trees that can be impacted by the establishment of front approaches and corresponding private driveways; and*
- c. Prevent fragmentation of the public boulevard in order to better accommodate on-street motor vehicle parking and public snow clearing.*

2.17 Locate commercial, mixed-use, or multiple family residential parking underground or behind buildings in order to create a more pedestrian-oriented built form. Active uses should be located at grade when these buildings face public streets.

Site design

2.22 Create or reinforce compact, pedestrian-oriented urban development patterns by ensuring the siting, form and scale of new development has a strong relationship to the street, public spaces and amenities in a way that is consistent with neighbourhood context.

Mature Communities Policies

4.10 Consider the establishment of new neighbourhood-focused, small scale commercial uses where at least one of the following criteria are met:

- a. The property is a corner lot fronting a collector or arterial street;*
- b. The property abuts an existing commercial use on a collector or arterial street;*
- c. Immediately adjacent uses render the subject property unsuitable for residential development; or*
- d. The property contains existing non-residential uses or buildings that were not designed to accommodate residential uses.*

4.1 Support commercial development where residential neighbourhoods are not well served by local and community commercial amenities.

4.4 New commercial development should be complementary and context sensitive to nearby uses.

CITY OF WINNIPEG ZONING BY-LAW 200/2006

“R1-M” Residential Single-Family Medium District

- Currently, the lands are zoned “R1-M” – Residential Single-family Medium. The intent of the “R1” zoning category is to accommodate primarily single-family residential development in lower-density areas.

“C1” Commercial Neighbourhood

- The “C1” Commercial Neighbourhood district is intended to accommodate small, compact commercial uses within or surrounded by residential areas that are attractive and compatible in scale and character with surrounding residential uses, to serve the convenience needs of the surrounding neighbourhood. “C1” districts are generally located in Neighbourhood or Community mixed use centres or along Neighbourhood or Community mixed use corridors.
- In “C1” and “C2” zoning districts, dwelling units must not be located on the first storey of any principal building.
- The first storey of a principal building may only be used for any use in the following use categories:
 - Public and Institutional;
 - Cultural and Entertainment; and
 - Commercial Sales and Service, except the Billboard Signs use sub-category

ANALYSIS OF PROPOSED REZONING

- The existing dwelling was previously used for a home based business (office use). The subject proposal aims to repurpose an existing residential building as an office building, which is a low intensity commercial use in terms of staffing, noise and visual impact (for example, signage).
- While the subject block is residential in character, the site is in close proximity to “C1” Commercial Neighbourhood and “C2” Commercial Community sites along the McPhillips Street arterial route.
- The proposed “C1” zoning and commercial use would introduce a low impact commercial use consistent with the objectives in the *Complete Communities Direction Strategy 2.0* as it directs commercial development to a corner lot located on an arterial route.
- For these reasons, the Public Service is supportive of the requested rezoning to “C1” Commercial Neighbourhood” to establish an office use.

CONDITIONS OF APPROVAL

- The Urban Planning & Design Division recommends a zoning agreement requiring that plans be submitted to the Director of Planning, Property and Development for review prior to the issuance of a development permit on the site. The inclusion of this clause will allow the Urban Planning Division to review final plans, including landscaping, before development takes place on the site.
- When a developer rezones and/or subdivides a parcel of land, they are required to put in an application with the City of Winnipeg. As a condition of rezoning or subdivision, a developer is required to contribute a portion of the land to be developed or cash in lieu to the City for parks purposes. The City is requesting cash in lieu for this application.
- In addition, the Public Service requires that the Developer, at no expense to the City, legally open property required for a +/-4.5 foot (1.373m) widening to the public lane along the full length of the site.

RECOMMENDATION

The Urban Planning Division recommends **approval** as the proposed rezoning application would generally comply with the *Complete Communities Direction Strategy 2.0* and would be compatible with the surrounding area.
