EXECUTIVE POLICY COMMITTEE

QUESTION PERIOD

Minute No. 281
Councillor Gerbasi referenced the matter of mosquito buffer zones and questioned if His Worship was talking with the Province about eliminating buffer zones completely.

His Worship Mayor Katz advised that there was no immediate action being taken, but that there was an existing meeting scheduled between the Province and City administration to look at options.

Councillor Gerbasi requested His Worship's opinion as to whether buffer zones should remain in place or whether they should be removed to which His Worship responded that he was maintaining an open mind on the subject and would like to hear from the public before making a decision.

Councillor Gerbasi questioned the status of the money in the tri-level agreement for infrastructure projects in Winnipeg to which His Worship replied that the money was definitely there and that the Province and the Federal Government were awaiting direction from City Council.
